## ALUMINIUM RIMS POLISHING

---

Aluminium rims will sparkle like new after a professional polish. The professional tool set for polishing aluminium rims offers everything you'll need. For larger areas, use the products designed for use with the angle polisher. For more detailed work, additional tools are included with a 6 mm shank. The pastes have been specially formulated for aluminium.

 Clean the rim after every polishing stage with a soft damp cloth and a little washing-up liquid. Ensure that pre-polishing paste residues are removed from the rim before starting high-gloss polishing work.
